***Examiner's statement of reasons for allowance***

The following is an examiner's statement of reasons for allowance:

1. Claims 1,15,31, and 49 are allowed because Prior art fails to show an objective lens for electron beam microscopy where the combined extension of the terminal electrode and the angular geometry of the pole shoes relative to each other results in a design that provides an undistorted magnetic field in the region of the sample while it is tilted over a large angular range. The use of an extended terminal electrode and a specific geometry of the pole shoes relative to each other to reduce distortion of the magnetic field along the optical axis, is patentable.

2. Claims 2-14,16-30, 32-48, 50 and 51 are allowed because they are dependent upon allowed claims 1,15,31, and 49.

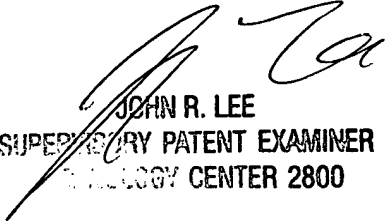

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**

3. Any inquiry concerning this communication or earlier communications should be directed to Phillip Johnston whose telephone number is (571) 272-2475.
